Eisenhower Matrix:

	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Prompt user for input and store required information like goal weight, current weight, current date, end date ● Display the weight in text file needed to move on for every day leading up to the final date ● Implement rest days	**Schedule - (For V2.0+)** ● Create front end rather than running in java terminal or using text file ● Adjust programming based on missed days or failure to achieve a certain weight ● Add de-load weeks
Not Important	**Delegate - (Use a library)** ● Date calculations using LocalDate library ● File input / output capabilities using BufferedReader and PrintWriter ● Input validation using Spring Validation library	**Delete - (Cut it)** ● Mobile app version ● Social abilities / leaderboards ● Different themes for the frontend
